

- (1) Hospital of patient choice
- (2) Hospital patient's Doctor practices at/admits to
- (3) Hospital most recently admitted to in the last year
- (4) Hospital TCC recommends

Patient transfer from nursing home or other care facility – EMSP to assure hospital has accepted the patient – Note transferring and receiving nurses' names

Does not apply to Trauma, Stroke, or STEMI system patients.

FRONT

Reminders:

Patient choice must **always** be followed.

Document patient choice or other DDT choice in your PCR – if available, have patient sign divert information form.

TCC routes Trauma, Stroke, & STEMI patients and a hospital's status for these patients overrides their divert status – call TCC to enter the patient!

If in doubt, call TCC

Use the DDT
